State Leaders in Heart Attack Care

When a heart attack strikes, receiving fast, life-saving care is critical. **Fairfield Medical Center knows every second counts**, so we partner with emergency personnel and other healthcare providers around the area to ensure that emergency cardiac patients are quickly evaluated, transported and treated.

FMC's collaboration with Hocking County EMS and Hocking Valley Community Hospital has been presented with the **American Heart Association's Mission: Lifeline® Silver Plus Receiving Quality Achievement Award** for meeting — and most often exceeding — speed of treatment standards. This award recognizes our unique partnership that streamlines care for heart attack patients, saving lives and improving quality of life.

When every second matters, you and your family can count on FMC and its partners to **lead the way with rapid-response cardiac care**.
