

Pre-Operative Skin Prep Instructions

Items Needed:

- *Clean Towel and Washcloth (2 sets-one for night, one for morning)*
- *Antibacterial Soap (Example: Dial)*
 - *No Fragrance, Lotion, or Moisturizers*
- *Chlorhexidine Gluconate Skin Wipes (provided; to be used **ONLY** in the morning)*

Night Before Surgery:

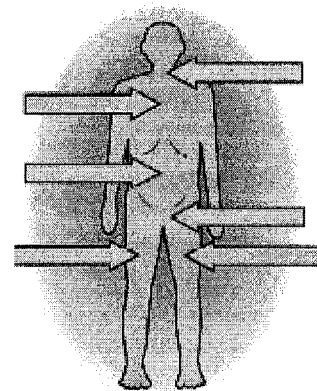

1. Shower using Antibacterial Soap; use clean washcloth
2. Use Clean Towel to dry skin completely
3. Place towel and washcloth in hamper (do **NOT** reuse in morning)
4. Put on clean pajamas and/or clean sheets on your bed

Morning of Surgery:

1. Shower with Antibacterial Soap; use clean washcloth
2. Use Clean Towel to dry skin
3. Once skin is completely dry from shower, use wipes as instructed in the below image

- **Directions for 2% Chlorhexidine Gluconate Cloths (6 pack):**

- Wash each of the six indicated areas with a different cloth and avoid contact with your eyes, ears and mouth.
- Using a scrubbing motion (up, down, back and forth) for approximately one minute and 30 seconds.
- Allow areas to air dry for one minute.
- **Do not rinse.**

4. Once skin is completely dry after using wipes, put on clean clothing
5. Do not use any deodorant, lotion or perfume/cologne
